

Colloquia

**Campus
Bahrenfeld
(DESY)**

**CFEL
Building 99**

**Seminar
rooms I-III**

14:00

Summer Semester 2014

- April 04 **Matthias Kling, LMU Munich, Germany**
"Imaging of the strong-field control of electron and nuclear dynamics in molecules and nanostructures"
- April 25 **Luca Giannessi, FERMI, Trieste, Italy**
"FERMI – The first X-UV ray externally seeded FEL facility"
- May 09 **Ulf Saalman, MPIPKS, Dresden, Germany**
"X-ray driven electron and ion dynamics in atomic and molecular clusters"
- May 23 **John Tisch, Imperial College, London, UK**
"The generation and application of few-cycle and attosecond light pulses"
- June 06 **Nuh Gedik, MIT, Cambridge, USA**
"Shining light on topological insulators"
- June 20 **Claus Ropers, University of Göttingen, Germany**
"Nanosopic photoelectron sources for the study of ultrafast structural dynamics"
- July 04 **Uwe Morgner, Leibniz Universität Hannover, Germany**
"Nonlinear optics with ultra-broadband oscillators"
