Winter Semester 2012/13

- Oct. 26 **Mildred Dresselhaus**, Massachusetts Institute of Technology
"My 50-year adventure with graphene"
- Nov. 9 **Ciulio Cerullo**, Politecnico di Milano
"Ultrabroadband optical parametric amplifiers: towards single-cycle CEP-controlled pulses"
- Nov. 23 **Philip Russell**, Max Planck Institute for the Science of Light
"Gas-based nonlinear optics in photonic crystal fibres"
- Dec. 7 **Tony Heinz**, Columbia University
Title to be announced
- Jan. 11 **Misha Ivanov**, Max Born Institute and Humboldt University
"Time-delays in ionization: real, imaginary, and imagined"
- Feb. 8 **Dan Neumark**, University of California, Berkeley
"Femtosecond and attosecond dynamics in atoms, molecules, and clusters"
- Feb 15 **Jonathan Marangos**, Imperial College, London
"Controlling recollisions to extract attosecond molecular dynamics & ionization dynamics in molecules"
