Summer Semester 2013

- April 12 **G rard Mourou**, IZEST, Ecole Polytechnique, Palaiseau, France  
*“Extreme light: laser ascent to subatomic physics”*
- April 26 **Ganapathy Baskaran**, The Institute of Mathematical Sciences, Chennai, India  
*“Light Touch”*
- May 10 **Peter Hommelhoff**, Max-Planck-Institut f r Quantenoptik, Garching  
*“From strong-field nano-optics to dielectric laser acceleration ”*
- May 31 **Martin Head-Gordon**, University of California, Berkeley  
*“Electronic structure for excited states of strongly correlated molecules: methods and applications”*
- June 14 **Thomas Elsaesser**, Max Born Institute and Humboldt University Berlin, Germany  
*“2D vibrational spectroscopy of DNA and phospholipids”*
- June 28 **Thomas Baumert**, Institut f r Physik und CINSaT, Kassel  
*“Coherent control of bound and free electron dynamics”*
- July 12 **Poul Nissen**, Aarhus University, Dept. Molecular Biology and Genetics  
*“Structural studies of membrane transport systems”*
