Winter Semester 2014/15

- Oct. 24 **Jochen Küpper**, DESY, CFEL & University of Hamburg, Germany  
*"Dynamics and reactivities of controlled molecules"*
- Nov. 7 **Angel Rubio**, MPSD, Germany  
*"Ab initio simulation of photon-matter interactions: non equilibrium dynamical processes within QED-TDDFT"*
- Nov. 21 **Martin Wegener**, KIT, Karlsruhe, Germany  
*"Transforming and cloaking"*
- Dec. 5 **Kenneth Schafer**, Louisiana State University, USA  
*"The interplay of microscopic and macroscopic effects in attosecond physics"*
- Dec. 19 **Stefano Marchesini**, LBNL, Berkeley, USA  
*"Diffractive imaging in high dimensions"*
- Jan. 16 **Yanhua Shih**, University of Maryland, Baltimore County, USA  
*"Quantum coherence and imaging"*
- Feb. 6 **John Costello**, Dublin City University, Ireland  
*"Stagnation layers at the collision front between counter-streaming laser plasma plumes - formation, properties and potential applications in pump-probe experiments"*
